Ford Airport Launches Redesigned Website At www.flygrandrapids.org

In the Internet Age, an organization's website speaks volumes. On the World Wide Web since 1997, the Airport's website receives thousands of "hits" each week. This completely redesigned site offers visitors a fresh, contemporary appearance and streamlined navigation, while maintaining the site's high-quality content.

New features include a parking calculator and 360-degree virtual tours of the baggage claim area and the Airport's Grand Hall. There are an expanded number of forms available electronically from the site. Real-Time Flight Information pages (the most frequently-visited pages on the site) have an updated look and improved functionality.

The Airport's News Media Information Guide is also now available on the website. This section includes photographic images available for use, a media FAQ section, and the most up-to-date policies in place for news media personnel.
