

TO: Vendors

FROM: AJ Nye – Procurement Specialist

Subject: Request No 2533 Canopy Column Painting – Update on engaging Action Pest Control (Bird Netting vendor)

Date: 7/11/2025

After Discussing with Action Pest Control in more detail, the airport will be contracting with them directly. **Bidding contractors do not need to contact Action Pest Control, or include any costs for their services in their bid.**

1. Prior to the painter being on site, action Pest Control will shift the netting to above the area on the columns that is to be painted.
2. After the column painting is completed, Action Pest Control will return and lower the netting on each column.
3. For the alternate painting 2 chords with rust spots (last page of the bid document) – prior to painting, Action Pest Control will be adding zippers to the netting in these locations, so the painter can unzip the location, paint the area, and zip the area closed again.

All of the above will be contracted by and coordinated with the airport.
